Year 2 Maths: Groups of Ten and Where Numbers Sit on a Line

Name: _____ Date: _____

Have a go first, then check the answers with a grown-up.

Practice

1. What is the 9 worth in 93?

2. How many tens make 100?

3. There are 8 piles of ten shells and 3 more shells. How many shells?

4. On a line marked in tens, 58 sits between which two numbers?

5. Write 114 in words.

Spot the mistake

6. What is wrong? "In 38, the 3 is worth 3."

7. What is wrong? "Count a big pile one shell at a time."

8. What is wrong? "61 goes halfway between 60 and 70."

Answer key (for parents and tutors)

1. What is the 9 worth in 93?
   90
2. How many tens make 100?
   10
3. There are 8 piles of ten shells and 3 more shells. How many shells?
   83
4. On a line marked in tens, 58 sits between which two numbers?
   50 and 60, close to 60
5. Write 114 in words.
   one hundred and fourteen
6. What is wrong? "In 38, the 3 is worth 3."
   The 3 is in the tens place, so it is worth 30.
7. What is wrong? "Count a big pile one shell at a time."
   Make groups of ten first. Count the tens, then add the ones left over.
8. What is wrong? "61 goes halfway between 60 and 70."
   61 is only 1 more than 60, so it goes just after 60.
